1 July 1962 - 30 June 1966

STATE OF CALIFORNIA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL

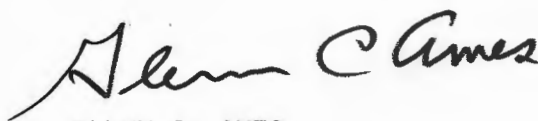

Honorable Ronald Reagan
Governor and Commander in Chief
Armed Forces of the State of California

Dear Governor Reagan:

I have the pleasure of submitting this Quadrennial Report for the Military Department for the period 1 July 1962 - 30 June 1966, pursuant to Sections 172 and 173, Military and Veterans Code, State of California, as amended.

This report covers a period during which the Honorable Edmund G. Brown was the Governor of the State of California and Lieutenant General Roderic L. Hill served as The Adjutant General.

Respectfully submitted,

GLENN C. AMES
Major General
The Adjutant General

MISSION

STATE - To provide effective military operations upon order of the Governor, for the protection of life and property during periods of emergency or disaster.

FEDERAL - To provide military units for federal mobilization at the highest possible state of training upon order of the President.

OBJECTIVES

To organize and maintain units of the Army and Air National Guard in accordance with established troop structure and authorized strength levels.

To provide trained units and qualified individuals for duty in time of war or during State and Federal emergencies.

To develop workable plans for mobilization and employment of the State Military Forces during emergencies.

To furnish, operate, and maintain adequate administrative, training, storage, and maintenance facilities for the Office of The Adjutant General and State Military Forces.

To provide, maintain, and insure the efficient, economical use of supplies and equipment required for support of the State Military Forces and the California Cadet Corps.

To program, disburse, and control funds necessary for the support of departmental activities so as to incur the most effective expenditure of State and Federal funds.

To weld all Military Department personnel into an integrated effective force imbued with a spirit of service to the State and Nation.

To insure continued and effective support for the Military Department by keeping the public, the Legislature, and the state administration fully and accurately informed regarding our objectives, programs and achievements.

ORGANIZATION

1962

California Army National Guard (CAL ARNG) on-site Air Defense Missile Battalions converted from NIKE-Ajax to NIKE-Hercules. (See "Air Defense Program").

All CAL ARNG units ordered to Active Duty for 1961 Berlin build-up were released from duty and returned to the State.

In July the Secretary of Defense submitted a proposal to the Governor for reorganization of CAL ARNG. The proposed reorganization was designed to increase the combat readiness of the Reserve Forces in order that they could more effectively compliment the Army. The increase in combat readiness was to be achieved by reassigning men from low priority units to high priority units, by increasing the equipment available to high priority units for training and by increasing the number of instructors and trainees assigned those units.

In December the new troop list for CAL ARNG was received from the National Guard Bureau, and was accepted by the Governor. Commanders were informed of units allocated to them and advised of the policies to be used as a guide in the preparation of their reorganization plan.

1963

In January the National Guard Bureau advised that California's two divisions would be reorganized under the most current Army Tables of Organization and Equipment (TOE). In addition, they provided organization and equipment guides (OEG) to be used by this State in the preparation of reorganization plans.

In March the 40th Armored Division and 49th Infantry Division were reorganized.

In September a board of officers was convened at the National Guard Bureau to review or revise all Army National Guard OEG's.

1964

In February, a new CAL ARNG Troop allocation, based on Department of the Army mobilization troop basis was received from the National Guard Bureau.

In March the 49th Infantry Division and 40th Armored Division were reorganized under final "E" series TOE's.

In June studies were initiated on the USCONARC Planning Group's report pertaining to the plan for military support of civil defense.

1965

Plans were announced in January for the proposed realignment of Reserve Forces of the Army, to include merger of the organized components of USAR and National Guard. At its conclusion, all organized elements of the Army's civilian component forces were to become part of the Army National Guard, with a total authorized strength of about 500,000 officers and enlisted men. The proposal

failed to pass Congress, and planning was once again initiated by the National Guard Bureau for a possible reorganization of the Army National Guard.

State Headquarters and Headquarters Detachment manning document was revised to include technicians for military support planning.

In November CAL ARNG carried out an extensive reorganization, redesignation and conversion program to organize and establish Selected Reserve Force (SRF) units and organizations as directed by the National Guard Bureau. A report on SRF is included on page 13 of this report.

1966

State Headquarters and Headquarters Detachment was reorganized under the Headquarters California Area Command, to be prepared to carry out its mobilization mission of military support to civil authorities.

TRAINING

1962

The requirements of Army Regulation 135-10 ("Mobilization of Army National Guard of the United States and Army Reserve Units") were implemented, establishing minimum standards of progress for organization, strength, attendance and training of National Guard units.

The United States Continental Army Command (USCONARC) Training Directive was changed to improve units' readiness to mobilize and promptly initiate a post mobilization training program to meet deployment schedules.

During the year CAL ARNG units participated in exercises conducted by the Active Army, a civil defense exercise conducted by the California Disaster Office and a statewide radio exercise directed by this headquarters.

1963

USCONARC specifically prohibited imposing additional required training without their approval, directed the use of proficiency tests to determine personnel for whom annual refresher training was required, and excused individuals from annual training on special emphasis subjects if found qualified through proficiency tests.

USCONARC Directed Reserve Component units appoint chemical, biological and radiological (CBR) personnel; CBR personnel were to be trained at an Army service school. Unit CBR Standing Operating Procedures were to be prepared, and CBR training integrated into unit training schedules whenever possible.

USCONARC required that units conduct 88 hours of Army Training Program subjects during scheduled annual field training periods.

The Reserve Component Enlisted Training Program (REP 63) was implemented. The program made it mandatory that all recruits in reserve component units complete a prescribed period of active duty at designated Army Training Centers.

In April, CAL ARNG Divisions participated in a tactical type Command Post Exercise, conducted by the active Army.

1964

USCONARC directed that all duly authorized and scheduled training assemblies conducted at armories or designated training sites would consist of four hours of training.

USCONARC Training Directive for Reserve Component units was changed to require that non-prior service enlisted personnel, awaiting departure for initial active duty under the Reserve Component Enlisted Training Program (REP 63), complete 16 hours of prescribed recruit training at home station.

This headquarters published guidance on Civil Disturbance training requiring orientation and refresher training on crowd control and riot prevention. In addition a manual on that subject prepared by the Department of Justice, State of California, was distributed to all ARNG units and headquarters.

Announcement was made in Army Regulation 11-35 ("Reserve Components Policies and Priorities") that Reserve Component units would be designated as either Immediate Reserve or Reinforcing Reserve. Immediate Reserve units would provide the active Army quick reinforcements to meet sudden crises while retaining a capability to support a general mobilization. The Reinforcing Reserve would consist of lower priority units needed as a basis for general mobilization.

Information was received that quotas for Army service schools had been severely curtailed for REP personnel. As a result, many recruits selected to receive training in a Military Occupational Specialty, normally requiring school training, received on-the-job training only, in accordance with assignment instructions provided by Department of the Army.

103d Ordnance Group participated in LOGEX 64, at Fort Lee, Virginia. The exercise provided training for selected officers and enlisted men in the importance of continuous logistical and administrative support requirements under nuclear, chemical and biological warfare conditions.

Selected CAL ARNG units participated in Operation Guard Lift I. The operation included the airlifting of personnel to Hawaii. Benefits included

mobility training and the challenge of adapting instruction to new training areas and planning requirements. Operations were conducted during units' Annual Field Training Period.

In May, selected CAL ARNG units participated in exercise Desert Strike, the first large scale armor exercise conducted since World War II.

In February, this headquarters conducted a statewide practice alert, Operation Spring Fever, to determine units' capability to respond to prescribed emergency readiness conditions. In March, CAL ARNG provided liaison and observer group personnel to participate for a Command Post Exercise conducted at Fort Bragg, North Carolina. In April the CAL ARNG Divisions participated in a Sixth US Army Command Post Exercise.

1965

USCONARC Training Directive was changed to require that unit intelligence schools be conducted to provide trained staffs and to improve and maintain proficiency of individuals in intelligence staff and reconnaissance assignments.

Department of the Army undertook an analysis of the desirability and feasibility of conducting advanced individual training (AIT) in units as on-the-job training (OJT) in lieu of formal advanced individual training at US Army Training centers. The purpose of the study was to determine at what point during the training cycle the recruit could be transferred from the training center to the unit. This headquarters advised Sixth US Army that advanced individual training conducted by the various US Army Training Centers and Service Schools was far more effective than similar training furnished individuals through on-the-job training assignments in units.

USCONARC granted authority for Sixth US Army to train REP 63 personnel at National Guard Maintenance Sites.

1966

USCONARC established two training objectives of non-SRF units:

- a. To attain and maintain the proficiency of all individuals in the fundamentals of combat.
- b. To achieve the highest level of unit training possible, consistent with strength, equipment and facilities.

Annual training program for the Military Support Group, SHHD, was implemented. The group's mission was to develop plans, procedures and a training program for the SHHD to implement its responsibilities under the military support concept.

USCONARC agreed that specialized Advanced Individual Training, conducted for active Army OCS applicants, would also be beneficial to REP 63 trainees who were applicants for the State OCS program; and issued following guidance:

a. Applicants for Officer Candidate School (OCS) will, to the maximum extent practicable, be placed in positions of responsibility involving the application of leadership ability at squad or platoon level throughout basic combat training (BCT) and advanced individual training (AIT).

b. During AIT, when practicable, personnel will be assigned to squad and platoons composed of OCS applicants for training under selected cadre. Where possible, OCS standards of performance and conduct will be imposed. Particular emphasis will be placed on motivational subjects, inspections, drill and command, weapons training, and physical training.

USCONARC announced that current regulations concerning a maximum of two days pay per one calendar day would remain in effect; however, that should in no way inhibit unit commanders from scheduling two consecutive days of training consisting of two 4-hour drills each or from continuing the training during all or part of the intervening night. The basic intent of a multiple unit training assembly-4 (MUTA-4) was to provide an opportunity for a unit to participate in field training, beginning on one morning and continuing through the following day. The scheduling of appropriate training exercises during the hours of darkness should be encouraged.

CALIFORNIA MILITARY ACADEMY (Formerly Officer Candidate Schools)

1962 - 1965

The procurement of junior officers for the California Army National Guard continues to be a pressing problem. The California Military Academy meets this need by providing an ever increasing opportunity for qualified enlisted men to obtain commissions in the California Army National Guard. Since the establishment of the State Officer Candidate Program in 1951, it has graduated 1,345 applicants for appointment as commissioned officers.

Regulations provide for an Academic Board to advise the Director of the California Military Academy, who is The Adjutant General, on policy matters affecting the Academy. On 12 July 1963, the Academic Board was convened at Camp San Luis Obispo, California, and several major changes to the program were announced.

These changes included adopting the name of California Military Academy in place of Officer Candidate School; expanding the training assemblies during

Phase II from 8 to 12 week-end assemblies, and providing for cadets to receive pay and drill credit for attending week-end assemblies in lieu of attending drills with their parent National Guard units. Other changes provided for cadets below pay grade of E-5 to be promoted to that grade while participating in the Academy, and additional clothing and equipment were authorized for issue to cadets participating in the Academy.

During this reporting period, the Academy had its largest graduating class. There were 177 applicants for the Class of '63, of whom 75 were graduated. In the Class of '64, 222 applicants were accepted and 105 graduated. The Class of '65 had 318 applicants accepted, out of which 158 were graduated.

Normally from 45 to 50 percent of the men who are accepted for the California Military Academy are able to successfully complete the program. Graduates of the Class of '63, '64 and '65 are listed in Appendix A.

Three Cadet Companies were in operation during this period; the First Cadet Company located originally in Glendale, then moved to Los Angeles and finally stationed in Pomona, California; the Second Cadet Company located in Long Beach, California; and the Third Cadet Company stationed in Stockton, California. During Phase I, Class of '66 (AFT-65), the Fourth and Fifth Cadet Companies were organized; however, they ceased to operate after completion of Phase I and the cadets from the Fourth Cadet Company were transferred to the Third Cadet Company and the cadets from the Fifth Cadet Company were transferred to the First and Second Cadet Companies.

In July, 1965, an innovation was introduced into the Phase III portion of the California Military Academy. The senior cadets of the Class of '65 were airlifted to the Infantry School, Fort Benning, Georgia, for a two day training and orientation period. Cadets were flown in C-97's provided by the California Air National Guard. The trip proved highly successful, both from the cadets' standpoint and for the opportunity it provided the California Military Academy to exhibit the professionalism of its program to the active Army. A similar trip to The Artillery and Missile School, Fort Sill, Oklahoma, is planned for the senior cadets of the of the Class of '66.

The General Carl H. Aulick Award is presented annually to the outstanding junior cadet during Phase I. The winners during the period of this report were:

1963 (Class of '64) Cadet Jerome P. Shoemaker, 132d Engr Bn

1964 (Class of '65) Cadet Nelson N. Clabaugh, 2d Bn, 144th Arty

1965 (Class of '66) Cadet Elbert A. Shelley, 579th Engr Bn

The Adjutant General selects the distinguished graduate of each class and also designates those with the highest leadership ability for special recognition.

The distinguished graduates of the Class of '63, '64 and '65 were:

- 2d Lt Reed T. Kimzey, 1114th Trans Co (Class of '63)
- 2d Lt Thomas W. Boggs, 118th Ord Co (Class of '64)
- 2d Lt Robert J. Eadington, 2d Bn, 159th Inf (Class of '65)

ARMY SERVICE SCHOOLS

1962-1965

An extensive school program supported from Federal funds is made available annually by the National Guard Bureau. The use of school funds is programmed by this headquarters so that officers and enlisted men may qualify themselves through participation in Army Service Schools, US Army Reserve Schools, Army Area Schools, Officer Candidate Schools and any extension courses.

In addition, the US Army Infantry School and the US Army Artillery and Missile School, Fort Benning, Georgia, and Fort Sill, Oklahoma, respectively, conduct special officer candidate courses for members of the Army National Guard and Army Reserve. These courses are of approximately ten weeks duration and are scheduled twice each year, beginning in February and June.

Graduates of these special courses during this period are listed on Appendix B. Appendix C contains information concerning the attendance at the various service schools during this same period.

MOBILIZATION

1962

As a result of the partial mobilization of Reserve Components during 1961, it was determined that the existing alert notification procedures must be updated. In November, Department of the Army directed the implementation of a new alert system, providing for the timely alert notification through channels of State authorities, unit commanders and members of alerted units prior to public announcement.

Also in November, USCONARC directed that added emphasis be placed on the accomplishment of essential pre-alert and pre-mobilization planning. In compliance with USCONARC direction, this headquarters published regulations outlining minimum mobilization planning requirements for CAL ARNG units and established test procedures to evaluate the effectiveness of such planning.

1963

In January, this headquarters provided CAL ARNG units with administrative instructions required to facilitate their entry into the active military service.

Instructions included specific guidance on preparation and maintenance of mobilization plans.

On 1 February, Army Regulations 135-300, "Mobilization of Army National Guard of the United States and Army Reserve Units", was distributed to CAL ARNG units. The regulations prescribed procedures for ordering or calling to active duty units and unit members of the Army National Guard.

On 22 March, USCONARC Regulations 135-13, "Mobilization Readiness", was distributed to CAL ARNG units. The regulations required a new type report concerning mobilization readiness that was to be prepared semi-annually by all units.

In June, this headquarters published material on the coordination of Alert and Assembly Plans with Civil Defense authorities.

In July, the National Guard Bureau directed that each State maintain a 120 day stock level of blank forms required upon mobilization. Appropriate guidance was provided CAL ARNG units later that month.

In October, following receipt of Sixth US Army Regulations 135-18, "Unit Movement Planning for Mobilization", this headquarters directed CAL ARNG units to review and rewrite mobilization and movement plans.

1964

In January, USCONARC directed that each Continental Army conduct a reserve component mobilization type Command Post Exercise (CPX) during either FY 65 or FY 66. Commanding General Sixth US Army directed that the CPX be conducted during FY 65.

Also in January, this headquarters provided CAL ARNG units instructions on preparation of mobilization forms not normally used by the National Guard. Forms were to be partially completed at the time of the appointment or enlistment of officers, warrant officers and enlisted men, and retained for use upon mobilization.

In June and September, selected units participated in practice mobilization test alerts, initiated by National Guard Bureau, and carried out in accordance with the new alert system. The test results were excellent, demonstrating the effectiveness of the new alert system.

Also in June, this headquarters concurred in a request by Central Defense Sector, Sixth US Army, that Santa Rosa and Auburn armories be designated and utilized as Joint Re-grouping Points for military survivors in event of nuclear attack.

1965

In June, a draft report was prepared on the M-day organization of the State Headquarters Detachment.

In September, this headquarters published instructions which clarified and modified certain portions of the mobilization directive, Army Regulation 135-300.

In October, CAL ARNG units were provided guidance on preparation of unit alert lists for notification of key personnel, and a format for the publication of organizational directories.

CAL ARNG participated in Command Post Exercise "Angry Arm", during period 4 January - 1 May. The exercise was considered an excellent training vehicle. Exercise objectives were as follows:

- a. Test and evaluate mobilization plans within Sixth US Army.
- b. Test and evaluate US Army Corps capabilities to order to active duty, process and move to mobilization stations those USAR and ARNG units and individuals located within Sixth US Army area.
- c. Exercise mobilization planning and coordination between Hq, Sixth US Army, US Army Corps, State Adjutants General, mobilization and support stations and reserve component units.
- d. Determine the impact of required physical examinations and immunizations under actual mobilization conditions and identify active Army augmentation support required.
- e. Familiarize commanders and staffs with mobilization plans, and to train them in mobilization procedures.

1966

In March, a monthly report system was initiated to keep Sixth US Army informed of the number of filler personnel required to bring Selected Reserve Force units to 100 percent strength in the event of mobilization.

CAL ARNG participated in Command Post Exercise "Angry Arm II", during the period 1 - 31 March. Mission and objectives were the same as prescribed for Angry Arm I conducted in 1965.

In June, a mobilization test alert was administered to all SRF units on direction of the National Guard Bureau. The test alert was accomplished in accordance with established alert procedures and was considered a complete success.

By the end of June, the State Headquarters and Headquarters Detachment was organized into its mobilization configuration, in preparation for the assigned mission of military support to civil defense.

AIR DEFENSE PROGRAM

1962-1966

During the period 1 July 1962 to 30 June 1966 the following are major significant events in the ARNG On-Site Defense Program:

In December 1962, the 1st Battalion, 250th Artillery and the 4th Battalion, 251st Artillery were reorganized and redesignated as NIKE-Hercules Battalions. On 27 June 1963, Batteries A and D, 4th Battalion, 251st Artillery were certified as operational by Commanding General, 6th Region Army Air Defense Command (ARADCOM) and assumed the NIKE-Hercules operational mission in the Los Angeles Defense at missile sites in Stanton and San Pedro, respectively. On 28 June 1963, Batteries A and B, 1st Battalion, 250th Artillery were certified as operational by Commanding General, 6th Region ARADCOM, and assumed the NIKE-Hercules operational mission in the San Francisco Defense at missile sites in Pacifica and Castro Valley, respectively. The final phase of the conversion to NIKE-Hercules was accomplished on 23 April 1964, when Batteries B and C, 4th Battalion, 251st Artillery were certified as operational by Commanding General, 6th Region ARADCOM, and assumed the NIKE-Hercules operational mission in the Los Angeles Defense at missile sites in Point Vicente and Brea, respectively.

The conversion of CAL ARNG air defense missile units from NIKE-Ajax to NIKE-Hercules increased the authorized technician strength from 406 to 568. These additional technicians increased the annual payroll from 2.4 million dollars to 3.6 million dollars, resulting in a net annual increase to California communities of 1.2 million dollars.

On 6 February 1966, the air defense program manning structure was reorganized which provided for an increase of 19 technicians, bringing the total technicians authorized to 581. Effective 1 May 1966, Chief, National Guard Bureau authorized the regrading and reclassification of certain positions which resulted in the upgrading of 260 technicians. The increase of 19 technicians and the upgrading resulted in a substantial increase to the annual payroll.

Since assuming the on-site NIKE-Hercules mission, CAL ARNG units have established an operational record second to none. This is evidenced by the following: in 1963 and 1964, both Battalions were awarded the 6th Region ARADCOM 100% Operational Award for distinguishing themselves by attaining a status of 100% Operational for Fiscal Year (FY) 63 and FY 64. The 4th Battalion, 251st Artillery was selected as the Outstanding National Guard Battalion in 6th Region ARADCOM

in FY 62, FY 63, and FY 64. The Calendar Year (CY) 65 ARADCOM On-Site Performance rating for the 4th Battalion, 251st Artillery was superior (99.82%); the highest of all like National Guard Battalions in the ARADCOM Task Organization. The 1st Battalion, 250th Artillery also received a rating of Superior (96.80%).

For FY 66 Battery B, 1st Battalion, 250th Artillery and Batteries A, B, and D, 4th Battalion, 251st Artillery received the ARADCOM "E" Award. This award was newly instituted in FY 66, and is awarded to those units cited by Commanding General, ARADCOM for Excellence in Combat Proficiency. All units have successfully passed all technical Standardization Inspections administered by the Inspector General, Defense Atomic Support Agency. All units have successfully passed their Annual Service Practice, with outstanding results.

In 1962 the 4th Battalion, 251st Artillery was awarded the ARADCOM Missile Firing Trophy. The Battalion attained a score of 97.65%, an all-time ARADCOM record which has never been surpassed by any other ARADCOM unit. In 1963, the 1st Battalion, 250th Artillery won this same coveted trophy. In 1963, Battery D, 4th Battalion, 251st Artillery was awarded the ARADCOM Trophy for 1st Place in Annual Service Practice with a score of 99.4%.

Highest of the year was the flawless performance of Battery D, 4th Battalion, 251st Artillery which achieved a 100% score in Annual Service Practice (SNAP). The battery performed all operations in system preparation, missile assembly, pre-fire tests and firing tests without an error, the only pure NIKE-Hercules unit in ARADCOM to ever achieve this distinction.

JOINT EXERCISE DESERT STRIKE

More than 4,000 California Army National Guardsmen participated during 16 - 30 May 1964 in Joint Exercise DESERT STRIKE, the largest peacetime maneuver in American military history.

Designed to provide realistic combat training for combat ready forces stationed in the United States, DESERT STRIKE was a US Strike Command Exercise held on more than 13 million acres of California-Nevada-Arizona desert. Major objective was to develop joint operational tactics and techniques to insure that USSTRICOM Army and Air Force units could deal decisively as a team with all types of contingencies, from a show of force to a general war. A total of 100,000 Active and Reserve soldiers and airmen were involved.

California National Guardsmen participated in lieu of Annual Field Training. It was the first time any California Guardsmen had taken part in an active Army exercise and maneuver with major active units.

CAL ARNG elements involved were: 2d Brigade, 40th Armored Division, commanded by Colonel Alvin E. Howell, with a strength of 3,407 officers and men; the 217th Transportation Battalion (Acht Maint), commanded by Lieutenant Colonel James W. Pinkerton, with a strength of 369 officers and men, and the 146th Evacuation Hospital, commanded by Colonel Robert C. Coombs, with a strength of 286 officers and men. Guardsmen from other 40th Armored Division elements were integrated into the 2d Brigade to bring it up to 100 percent strength.

The exercise revealed many problems associated with logistical and communications operations, due largely to use of obsolete equipment and lack of repair parts. However, the benefits received from participation far outweighed the shortcomings that were experienced and had a great effect upon future training of the units and men concerned.

The experience received in the planning stages and in the motor movements to and from the maneuver area by all elements provided excellent opportunities for training and enabled commanders to evaluate the effects of prior planning and past training. The most significant factor was the importance attached to the ability of a reserve organization to accomplish this type exercise, even beyond the limits imposed by state of training and equipment availability.

"Our people met every test imposed upon them. They were used continually in a combat role so the training was invaluable for the commander down to the individual in the ranks", said Lieutenant General Roderic L. Hill, The Adjutant General.

Laudatory comments were received from Army General Paul D. Adams, Commander of the USSTRICOM and Director of the maneuver.

"Please accept for yourself and pass to your officers and men my congratulations for your soldierly and competent conduct and performance", General Adams said in a message to Colonel Howell.

"It has been a pleasure to have you with the United States Strike Command and a source of satisfaction that your unit has been able to utilize this expansive tank maneuver area and take advantage of this excellent field training opportunity. Good luck in the future and thank you for a job well done."

SELECTED RESERVE FORCE

By direction of the Department of the Army, a Selected Reserve Force (SRF) was organized in the late fall of 1965.

The fundamental objective of SRF elements is to reduce to a minimum the time required to mobilize, complete training and deploy should the need arise.

As a mobilization objective, SRF elements are required to accomplish actions necessary to permit units to move to mobilization stations after a seven day alert.

As a training objective, SRF elements were required to complete appropriate Army Training Tests up to battalion level by the end of Annual Field Training 1966.

To assist in the accomplishment of these objectives, units were authorized to accelerate training under appropriate Army Training Programs based upon estimates of training levels and training situations. All SRF elements were authorized to conduct six additional training assemblies for each fiscal quarter in addition to the normal 48 training assemblies authorized for each training year. In addition, SRF staffs and staffs of non-SRF supervisory headquarters were authorized to conduct additional staff training assemblies as required.

Twelve units assigned or attached to the 40th Armored Division were reorganized and designated to become SRF units on 1 November 1965 with a total authorized strength of 2,148. Certain units organic to the 49th Infantry Division were reorganized and redesignated on 4 December 1965 to provide 33 units, with a strength of 4,476, to form the 49th Infantry Brigade (SEP) (SRF). Three units of the 103d Ordnance Group, with a strength of 285, were reorganized and designated SRF also on 4 December 1965.

Approximately one-third of all California Army National Guardsmen are members of the Selected Reserve Force units, although SRF units comprise approximately one-fifth of the total CAL ARNG units.

Organization of the 49th Infantry Brigade (SEP) imposed a tremendous drain on the resources of the 49th Infantry Division. The division furnished all available MOS qualified personnel and most of the brigade's equipment. Certain elements of the 40th Armored Division were designated as part of the 29th Infantry Brigade (SEP) (SRF), Hawaii ARNG. Although the training responsibility of these units rests with the 29th Infantry Brigade Commander, training supervision continued to be a responsibility of California, with immediate supervision being delegated to the 40th Armored Division.

The training objective given to the SRF was a big one to achieve in the short time available. Members of the SRF found themselves training longer and more often than any other citizen Reserve Force in history. And for some men -- due to the reassignment of manpower -- training with their new units meant a 100 mile, or more, trip each way. The increased training time means a 200 per-

cent increase over the old once-a-week two-hours evening drill and a 40 percent increase in training time over the once-a-month weekend drill. Members of the SRF units are undergoing the hardest training that Guardsmen ever have been required to perform while in an inactive duty status.

The willingness of both SRF and non-SRF Guardsmen involved to put out the additional time and effort is laudable.

"This is where the action is and this is where the men want to be", is the way one SRF battalion commander put it.

The challenge to become part of the SRF is described by a company commander.

"I didn't hesitate to take this assignment -- we've felt we have worked at a disadvantage in the National Guard because we didn't have enough equipment to train properly, or enough time to really accomplish our training mission."

Most of the equipment essential to combat operations and training was finally received by April 1966 but prior to that time there were serious shortages of tires and communication equipment. Maintenance on vehicles was a problem with most SRF units and will continue to be so.

"The burden we placed on our commanders at the company and higher level was an extreme one . . . perhaps we didn't realize how much a burden it would be", The Adjutant General said, in reviewing the enormous administrative load imposed by the SRF requirements.

As paperwork mounted higher and higher, wives, daughters and friends pitched in to help. When the 40th Armored Division sent its entire clerical section to the 4th Battalion, 160th Infantry for one week, 15 people worked full time in four armories.

Physical examinations and Identification Card photos proved to be the most difficult administrative problems statewide.

It was necessary to remove approximately 6,700 individuals from required training in order for them to receive physical examinations and ID card photographs. Also time consuming was transportation to and from military medical facilities which had the equipment to perform the necessary laboratory work. When possible, ID card photos were taken at the same time as physical examinations. In some instances it was necessary to borrow photographic equipment from the Air National Guard and active Army installations and train photographers who then travelled to various units and took the required photographs.

It seems fitting to recognize those who brought about the attainment of these objectives: the Surgeon's Office of Sixth US Army in coordinating the use of military medical facilities; Army National Guard medical personnel of non-SRF units who gave many hours without reimbursement to complete the physical examinations; Active Army installations which loaned photographic equipment and then developed the film for the ID cards and the Air National Guard, who, in addition to providing photographic equipment, provided air transportation of military medical teams to outlying areas in order that SRF physicals could be accomplished without recourse to the more expensive civilian medical facilities.

The Speech and Hearing Department of San Jose State College gave unselfishly of time and effort in order to provide the units in and around San Jose with an efficient means to take the required audiometric tests.

One of the biggest administrative headaches was the requirement for ID photos of dependents. The most successful method of meeting this need was the open house for families, generally on the morning of a Sunday assembly. The open house usually included an orientation by the company commander, a question and answer period and the serving of refreshments. One enterprising company included a TV doorprize as an added inducement for good attendance.

Overcoming employer opposition became a commander's additional responsibility. However, it was found that no employer failed to understand what the Guard was trying to do once the Commander had talked to him. One SRF company furnished certain employers with the assembly training schedule so the employer could adjust his work schedule accordingly.

SRF and non-SRF are entitled to plaudits. Although the SRF was well supported in the way of funds and extra drills and equipment, it was not initially apparent how much support was required from the non-SRF to make the program successful. Non-SRF personnel have participated in many unpaid assemblies. Non-SRF division staffs have expended considerable time and effort in solving SRF problems to the detriment of their own divisions. Supervision and management has been generally excellent, but at the expense of almost all other activities in the CAL ARNG.

The work and the support is paying off. During this period of intensified training, the majority of units have achieved a state of readiness that meets the established objectives and it is anticipated that in the very near future all selected units will have achieved the objectives.

Following is the Troop List of the CAL ARNG Selected Reserve Force:

<u>Unit</u>	<u>Location</u>
49th Infantry Brigade (Sep)	
Headquarters & Headquarters Company	San Jose
256th Engineer Company	Petaluma
149th Aviation Company	Sacramento
Troop E, 170th Cavalry	Richmond
3d Battalion, 143d Artillery	
Headquarters & Headquarters & Service Battery	San Mateo
Battery A	Redwood City
Battery B	San Jose
Battery C	Richmond
2d Battalion, 159th Infantry	
Headquarters & Headquarters Company	San Jose
Company A	Ft Funston, San Francisco
Company B	Sunnyvale
Company C	San Jose
1st Battalion, 184th Infantry	
Headquarters & Headquarters Company	Sacramento
Company A (less Separate Detachment)	Chico
Separate Detachment Company A	Yuba City
Company B (less Weapons Platoon)	Oroville
Weapons Platoon, Company B	Nevada City
Company C	Walnut Creek
2d Battalion, 185th Infantry	
Headquarters & Headquarters (less Battalion Heavy Mortor Platoon)	Modesto
Battalion Heavy Mortor Platoon, Hq & Hq Co	Columbia
Company A (less Separate Detachment)	Madera
Separate Detachment, Company A	Merced
Company B (less Separate Detachment)	Visalia
Separate Detachment, Company B	Tulare
Company C (less Separate Detachment)	Reedley
Separate Detachment, Company C	Hanford
4th Battalion, 160th Infantry (Part of 29th Infantry Brigade (SEP) Hawaii ARNG)	
Headquarters & Headquarters Company	Long Beach
Company A	Santa Ana
Company B	Fullerton
Company C	Glendale
29th Aviation Company (Part of 29th Infantry Brigade (SEP) Hawaii ARNG)	Long Beach
Troop E, 111th Cavalry (Part of 29th Infantry Brigade (SEP) Hawaii ARNG)	San Diego

<u>Unit</u>	<u>Location</u>
1st Squadron, 18th Armored Cavalry	
Headquarters & Headquarters Troop	Burbank
Troop A	Burbank
Troop B	Sylmar
Troop C	Inglewood
Troop D	Lancaster
Howitzer Battery	Van Nuys
Headquarters & Headquarters Detachment, 103d	
Ordnance Group	San Francisco
112th Engineer Company (Dump Truck)	Eureka
428th Ordnance Company (less Separate Detachment)	Alameda
Separate Detachment, 428th Ordnance Company	Fort Funston, San Francisco

MILITARY AID AND RELIEF

The first call for military assistance to fire suppression crews in 1962 was received on 27 August. The US Forestry Service required 2-1/2 ton trucks and drivers to transport fire fighting crews and equipment to a fire burning in the Shasta Trinity National Forests near Redding. The 1401st Engineer Battalion provided 31 troops and thirteen 2-1/2 ton trucks to assist in suppression of the fires.

On 31 August 1962, a forest fire developed in the Kings Canyon National Park. Seven 2-1/2 ton trucks with drivers from the 2d Battalion, 185th Armor, were dispatched to assist in transporting fire fighting crews and equipment.

During October 1962, Guardsmen of Company B, 1st Battle Group, 159th Infantry, assisted in evacuating families endangered by flood waters in the San Francisco Bay Area.

In December 1962, two officers and two aircraft of the 140th Aviation Company engaged in air search for a 40th Armored Division aviation officer who disappeared during a flight off the coast of California in the Santa Barbara area. No evidence of the downed aircraft was found.

During 31 January and 1 February 1963, the 49th Quartermaster Company furnished 5 trucks with drivers to rescue families from flood waters in the Concord area.

In April 1963, a jeep mounted 105mm recoilless rifle manned by personnel of the 1st Battalion, 184th Infantry, fired at a snow cornice on Highway 50 in

the Sierra Nevada mountains which was endangering traffic on the highway. In January 1964, personnel of 1st Battalion, 184th Infantry again assisted the Division of Highways by firing at another snow cornice endangering traffic on Highway 50.

The 2d Battalion, 185th Armor, assisted in the search for a lost child in the Mojave Desert area of Kern County during April 1964. The battalion employed 110 personnel and 25 vehicles.

During the early part of May 1964, 60 personnel of the 49th Infantry Division took part in a search for the Battalion Commander, 49th Aviation Battalion, who had crashed in the mountains south of Lake Tahoe. The plane was located after a week's search. The occupants were dead.

Company C, 3d Battalion, 149th Armor, provided 18 personnel in July 1964 to act as honor guards during the funeral services for Senator Clair Engle of Red Bluff.

During August 1964, the 1401st Engineer Battalion in Redding provided vehicles and drivers to transport fire fighting crews and equipment during the Hayfork fires (in the vicinity of Redding). Elements of the 49th Infantry Division units augmented the 1401st Engineer Battalion units during this support mission.

From 24 September through 4 October 1964, 403 mandays were expended by units of the 40th Armored Division Artillery supporting the Forestry Service in suppressing fires in the Los Padres National Forest. Personnel and trucks were utilized for transporting fire fighting crews and equipment to the fire lines, and transporting supplies from the forestry service warehouse in Arcadia to Santa Barbara, where crews were housed during the period of the fire.

During the University of California demonstrations at Berkeley on 1 and 2 October 1964, personnel of the Office of The Adjutant General and the staff of the 49th Infantry Division coordinated activities with the Berkeley Police Department to control demonstrations should they develop into civil disturbance type situations. Three battalions of Guardsmen in the San Francisco Bay Area were alerted for possible action but were not assembled.

On 21-22 September 1964, personnel of the 579th Engineer Battalion provided trucks and bulldozers to assist in suppressing a fire in Sonoma County and were prepared to evacuate patients from the Sonoma County Hospital threatened by the fire.

The 579th Engineer Battalion provided personnel and trucks to suppress a fire near the Handley Fire Camp in Sonoma County during the period 23-26 September 1964.

During the period 23 December 1964 to 14 February 1965, 832 personnel of the Army and Air National Guard were employed in flooded areas throughout Northern California. Troops and equipment were employed for: patrolling and reinforcing of levees; rescue of lives and property in isolated areas; transporting of relief supplies (food stuffs, clothing, liquid petroleum, gases, and livestock feed) into isolated areas; security of airfields where relief supplies were stored and security patrols around abandoned property as identified by sheriff's offices; operation of amphibious vehicles for rescue of isolated personnel; loading and unloading of aircraft with emergency supplies for the Eureka area; airlift of emergency supplies into disaster areas; providing mobile emergency tower control for aircraft, and operation of a ferry across the Klamath River.

Units of the Army National Guard participating during this emergency period were: HHC 1st Bde, 49th Inf Div; HHC 3d Bn, 149th Armor; HHT and Trp C 1st Sqdn, 170th Cav; HHC 1st Bn, 184th Inf; HHC 2d Bde, 49th Inf Div; HHC 1st Bn, 159th Inf; all units 2d Bn, 159th Inf; HHC 1st Bn, 149th Armor; HHC 4th Bn, 149th Armor; HHC and Co's A, C, E, 579th Engr Bn; 49th Avn Bn; 1114th Transportation Co; 118th Ord Co; HHC and Co's A, B, C, 1401st Engr Bn. Air National Guard units aiding in flood duty were Hq 129th Air Commando Gp; Hq 146th Air Transport Wing and Hq 234th Mobile Commo Flight.

During the civil disturbance in Los Angeles 13,393 troops of the 40th Armored Division and 49th Infantry Division were employed during the period 13 through 24 August 1965, in aid of civil authorities by: providing troops to assist law enforcement to reestablish law and order in curfew areas; providing armed security for fire stations and fire fighting crews at scenes of fires, and public utility crews restoring utilities in the riot areas, and various agency personnel distributing food stuffs in riot area; security for jails housing arrested rioters and courts trying offenders, and manning of roadblocks in curfew areas. Air National Guard personnel and aircraft from the 146th HAW and 129th Air Comd Gp provided airlift of troops, supplies and equipment from Northern California to Los Angeles area and return. A total of 65,858 mandays were utilized during the emergency period. (See page 25 for a more detailed report.)

On 17 September 1965, a request was received from the State Division of Forestry for trucks and drivers to transport fire fighting crews and equipment to fires in Sonoma and Napa Counties. As the fire situation grew worse, the Forestry Service requested airlift by Air National Guard aircraft of prisoners from the State Institution at Chino and Tehachapi to the Sonoma County area. The 146th Military Airlift Wing provided airlift of prisoners to Hamilton Air Force Base where National Guard trucks were waiting to transport the prisoners to the fire lines. When the fires were under control, the Air National Guard aircraft returned the prisoners to Chino and Tehachapi. During the period 16 to 23 September 1965, a total of 322 mandays were utilized by Guardsmen and 496 passengers had been transported by the Air National Guard.

During the period 15-16 October 1965, 404 personnel of the 1st Bn, 159th Infantry and 2d Bn, 184th Infantry, were in a standby status for possible aid to civil authorities during the Viet Nam Day Committee demonstrations in the Berkeley and Oakland area.

On 18 November 1965, Guardsmen were again called upon to standby status in event the VDC march to the Oakland Army Depot developed into a major civil disturbance. Four hundred sixty eight Guardsmen of the 1st Bn, 159th Infantry and 2d Bn, 184th Infantry, were on standby status during the period 18-20 November 1965, but were not employed.

When a civil disturbance appeared imminent in Vallejo on 17 December 1965, 454 personnel of the 3632d Ord Co and 49th Signal Bn were alerted for possible aid to civil authorities. Guardsmen were on alert status until 20 December 1965, when the situation was controlled by civil authorities.

In early January 1966, Guardsmen were again called upon to aid in flooded areas in Northern California Coastal areas. Personnel of the 1401st Engineer Bn and 112th Engineer Co aided civil authorities in evacuation of civilians from isolated areas, and transported food and supplies to stranded families in the Eureka area. The 579th Engineer Bn provided trucks and drivers for aid to civil authorities in the Guerneville and Geyserville areas. During the period 4-7 January 1966, 110 State Active Duty mandays were utilized.

When an impending civil disturbance in the Watts area of Los Angeles appeared to be developing on 15 March 1966, 500 Guardsmen were again called upon to standby for possible aid to Los Angeles police authorities. When the unrest subsided on 16 March, troops were released from their alert status. Units responding to this alert situation were 4th Bn, 160th Inf; 1st Bn, 160th Inf; 1st Sqdn, 18th Armd Cav, and 3d Bn, 160th Inf.

Again on 18 March 1966, a civil disturbance appeared to be developing in the Richmond area. Troop E, 1st Sqdn, 170th Cav and the 1st Bn, 143d Arty were alerted for possible duty. The situation continued until 20 March 1966, at which time it subsided and troops were released from alert status.

During the inquest of the death of a negro citizen in Los Angeles beginning 18 May 1966, a considerable amount of civil unrest developed. Again Guardsmen were placed on an alert status. The alert status was alternated between the 1st Sqdn, 18th Armd Cav, and the 4th Bn, 160th Inf, until 2 June 1966, when the inquest concluded. The unrest subsided without major incidents and troops were released from their alert status.

Guardsmen were again called upon to aid in suppression of forest fires in the Los Padres National Forest on 13 June 1966. Seven hundred seventy six mandays

were utilized by personnel of the 1st, 2d and 3d Bn, 144th Arty, in transporting fire fighting crews and equipment to and from the fire lines. The fire was controlled on 7 July 1966.

At the same time Guardsmen were aiding in the fire in the Los Padres National Park, a request was received for aid in the Breckenridge Fire (Kern County east of Bakersfield). The 2d Bn, 185th Armor responded with 33 personnel and 12 trucks on 16 June and continued until 21 June 1966.

SUMMARY
MILITARY AID AND RELIEF

1 Jul 62 - 30 Jun 66

*Military Support of Civil Defense

PLANS BRANCH

The Plans Branch, Army Division, was organized in early 1965 when the Governor accepted, from the Department of the Army, the responsibility for The Adjutant General to plan for the Military Support of Civil Authorities in a Civil Defense Emergency in the State of California. This branch is manned by Federally paid Military Support Planning Technicians.

The Plans Branch performs the following primary functions:

Advises The Adjutant General and Staff in matters relating to the Military Support of Civil Authorities.

Initiates, develops, coordinates, publishes, reviews and maintains plans for employment of all military forces, active and reserve, within the State in support of civil authorities during war caused emergencies; also plans for the employment of State Military Forces during State disasters and civil disturbances.

Coordinates with active and reserve Army, Air Force, Navy and Coast Guard commands within the State, and obtains their concurrence in proposed military support plans or changes thereto.

Develops contingency plans for the employment of the ARNG in ground security missions as required by Commanding General, Sixth US Army.

Prepares emergency operations plan and develops emergency standing operating procedure for State Military Headquarters.

Activates and initially operates OTAG's emergency operations center as required and compiles official journal records of all State Military Forces' participation in disaster, civil disturbances or other State emergencies.

Prepares special or recurring reports pertaining to military support of civil authorities.

Develops training requirements and compiles and assembles instructional material relating to the military support of civil defense mission.

Recommends distribution and monitors the use made of supplies and equipment related to the Civil Defense mission.

Assists in maintaining liaison between OTAG, Sixth US Army, other Federal and State agencies and local authorities and in representing The Adjutant General at seminars, conferences and other gatherings of civic and military groups concerned with civil defense and other emergency plans.

Maintains troop availability list and capabilities index for forces identified as available for military support of civil defense.

LOS ANGELES (WATTS) RIOT DUTY

The Los Angeles riot of August 1965 has been called the most destructive in our country's history.

To suppress this riot and begin the restoration of order required the commitment in the 46 square mile riot area of over 1,300 police officers and more than 13,400 Guardsmen. Before Guard units were withdrawn, the State of California had expended more than \$187,600 for subsistence, services, and general supplies required by the troops. More than 65,800 mandays of military State active duty were logged, at a cost for military pay and allowances in excess of \$607,600.

Without doubt, the California National Guard's part in suppressing this riot constitutes the nation's most extensive and most costly employment of State Military Forces in connection with a civil disturbance to date.

In December 1966, the Military Department published a report, printed by the State Printing Office, of the California National Guard's part in this operation. The report, Military Support of Law Enforcement During Civil Disturbances, brings out the many lessons learned and the implications for future emergency planning and training by National Guard units. It deals extensively with matters pertaining to coordination and cooperation between Guard and law enforcement personnel, at all levels, during the emergency.

Copies of the report are available from the Department of General Services, Documents and Publications, Sacramento, California 95814.

FACILITIES BRANCH

The following describes the minor repairs, alterations and miscellaneous projects undertaken during the period covered by the subject quadrenium. The projects fall into three general categories:

a. Repair, maintenance and alterations. Such projects as door replacement, plumbing, and heating repairs, painting, etc, average approximately \$1,000 each. Federal funds augment State funds to support these projects.

b. Minor capital. These are similar to projects in "a", above, but larger in scope. Repair of paving, roofs, and enlarging vehicle storage areas are typical

of projects included in this category. Federal funds augment State funds for these projects also.

c. Repair and Utilities. R&U projects are supported entirely from federal funds although state funds are involved in connection with inspection, supervision and acceptance. These projects involve organizational maintenance shops, equipment concentration sites, and combined support maintenance shops. Such repairs as overhaul of overhead cranes and other installed equipment, repair and replacement of overhead doors, modification of electrical systems are typical R&U projects. An annual recapitulation of each category by number of projects and total dollar cost follows:

Project		63	64	65	66
Repairs, Maintenance and alterations	No.	41	83	96	106
	Amt	\$ 88,346	\$101,111	\$ 89,866	\$116,965
Minor Capital	No.	6	6	4	9
	Amt	\$121,574	\$111,473	\$ 99,401	\$224,416
R & U	No.	3	5	2	2
	Amt	\$ 46,345	\$ 8,615	\$ 8,979	\$ 20,384

Beginning in September 1962, a total of 12 new armories were constructed and occupied. These armories were designated to be more functional and versatile than those constructed prior to 1960. Details of these armories follow:

Location	Area	Type	State Cost	Federal Cost	Completed
Hollister	II	1 Unit	\$108,146	\$113,505	Sept 1962
Sylmar	III	1 Unit	115,099	117,735	Sept 1962
Turlock	Hq	1 Unit	71,425	111,908	May 1963
Ventura	III	3 Unit	44,870	405,030	Jun 1963
Roseville	Hq	1 Unit + Hq	171,552	172,500	Aug 1963
Stockton	Hq	5 Unit + 2 Hq	267,925	369,575	May 1964
Gilroy	II	1 Unit	103,226	136,850	Jul 1964
Porterville	III	1 Unit	85,637	140,390	Nov 1964
Los Angeles	IV	3 Unit + 2 Hq	241,811	352,618	Dec 1964
Van Nuys	III	4 Unit + Hq	162,000	232,000	Jan 1965
Benicia	I	1 Unit	178,237	173,341	Jun 1965
Sacramento	Hq	5 Unit + 2 Hq	371,464	353,136	Jun 1965

The State shares the cost of armory construction with the federal government on a 25-75 basis. However, state construction standards exceed federal criteria in many areas which accounts for the fact that in most cases the State's share averages closer to 50%. The notable exception listed above is the Ventura armory which was constructed to house both Army National Guard and Army Reserve units. Federal funds were used to cover the entire cost of the Army Reserve portion of the facility in addition to the normal sharing of the National Guard portion.

As of 1 July 1965, the federal government returned to State control the 5,800 acres of State-owned land which comprises Camp San Luis Obispo. The return of this property included buildings, utility systems and other improvements representing a federal investment in excess of 18 million dollars. This turn-back was accompanied by the transfer to State ownership of maintenance and operating equipment valued in excess of \$300,000. The camp houses the year round Supply Division of the USPF0; provides unit training facilities for weekend and annual field training requirements; and is ideally suited for use as the active duty training site of the California Military Academy, the State conducted officer candidate school. To the extent that portions of this installation are excess to the requirements of the Military Department some of the improved areas have been transferred to other State agencies, notably the Department of Corrections, and also by sales to the newly organized Cuesta College and to the County of San Luis Obispo.

An additional armory facility was acquired in November 1965 by long term lease from the City of Long Beach. Former NIKE Site 40, located adjacent to the Municipal Airport, including approximately 20 acres of real estate, a headquarters building, a converted barracks, and a mess hall, now provides unit housing for aviation units of the 40th Armored Division and 29th Brigade (Sep). This site will be improved by the construction of an Army Aviation Maintenance Shop and related facilities to support the aviation elements of the California Army National Guard in Southern California. This project, to be constructed entirely from federal funds, has been deferred because of the demand created by the Vietnam conflict.

UNIT ACTIVATION/DEACTIVATION
MOBILIZATION/DEMobilIZATION
ORGANIZATION/REORGANIZATION

31 August 1962

The 146th Air Transport Wing (Heavy), which was mobilized into active Federal Service on 1 October 1961 in support of the partial mobilization during the Berlin Crisis, was returned to State service on 31 August 1962. Attending the formal inactivation ceremonies at the Van Nuys Air Guard Base were Governor Edmund G. Brown; Major General Roderic L. Hill, The Adjutant General; Brigadier General Robert Martell, Deputy Adjutant General, Air; Major General Winston P. Wilson, Deputy Chief, National Guard Bureau; Congressmen James Corman and Edgar Hiestand.

A significant fact of this mobilization is that for the first time an active USAF organization operated from a State controlled air base as a tenant.

1 July 1964

Command of the 146th Air Transport Wing passed from Brigadier General Robert D. Campbell to Colonel Raymond J. Kopecky on 1 July 1964. General Campbell was transferred by his civilian employer, "Newsweek" to New York. Colonel William Pendleton assumed command of the 146th Air Transport Group.

1 October 1965

Brigadier General Robert J. Martell, Deputy Adjutant General, Air Force Division, Military Department retired from State Active Duty. Assuming his position was Brigadier General George W. Edmonds, former commander of the 146th Air Defense Wing at Fresno, California.

December 1965

The 195th Air Transport Squadron, at Van Nuys, received information that it was to be inactivated on 30 June 1966, as part of the DOD's program to reorganize the Reserve components. Through strong protest action by many individuals, including members of the Military Department and the California Congressional Delegation, the inactivation has been delayed and at the time of this report final action is still pending.

Fiscal Year 1963

146th Military Airlift Group converted from C97C to C97G aircraft. The aircraft received by the unit were KC97G refueling aircraft previously used by the Strategic Air Command. Air Research Incorporated of Los Angeles accomplished the modification of these aircraft.

AIRCRAFT / EQUIPMENT CONVERSIONS/MODIFICATION

July 1963

The 129th Air Commando Group converted from 6 HU-16 flying boat aircraft to 8 C119 aircraft. In addition the unit received 6 U10 Helio single engine aircraft.

May 1964

The 144th Fighter Group received formal notice of programmed conversion of aircraft from the F86L to F102 supersonic all-weather interceptor aircraft. The conversion started on 4 August 1964 and was completed on 9 February 1966 when the unit passed an Operational Readiness Inspection by Air Defense Command.

1 January 1965

The 163d Fighter Group received formal notice of conversion from the F86L to the F102 aircraft. Conversion commenced on 17 May 1965 and is estimated to be completed by August 1966.

1966

The 129th Air Commando Group received 6 U6 single engine aircraft to replace the U10's which were returned to the Air Force for use in Vietnam.

Fiscal Year 64 - Fiscal Year 65

The high frequency radio equipment (AN/GRC/260) assigned to the 162d Communication Group was modified to obtain single side band capability. This new modification will give the equipment greater capability to operate more effectively in periods of State and Federal emergencies. The new designation of the equipment is AN/GRC-129.

STATE SERVICE

January 1963

The 146th Air Transport Wing transported 50,000 burlap bags to aid flood-ravaged Reno, Nevada. The bags were obtained by the US Corps of Engineers from a Los Angeles manufacturer and were flown in two aircraft to stem the rising waters from monumental rains. The 2 C-97 aircraft unloaded the bags at Reno and continued on to Japan for an overwater training mission.

May 1963

The 146th Air Transport Wing transported 14,000 lbs of food and clothing for a drought stricken portion of Mexico just across the border from McAllen, Texas.

The 146th Air Transport Wing airlifted 3,000 lbs of medical books to a hospital in Nagoya, Japan, one of several Los Angeles sister cities.

March - April 1964

The 146th Air Transport Wing transported 35 tons of relief supplies to victims of the Alaskan earthquake flying 8 missions and 176 flying hours.

December 1964 - January 1965

During the period of extensive and widespread floods in Northern California, units of the California Air and Army National Guard performed a variety of relief and mercy missions to reduce property loss and human suffering. Air units of the California Air National Guard accomplished the following:

- a. 146th Military Airlift Group flew 73 missions totaling 220 hours and carried 211 passengers; 1,004,000 lbs of cargo.
- b. 129th Air Commando Group flew 91 missions totaling 286 hours, and carried 154 passengers; 660,000 lbs of cargo.
- c. The 234th Mobile Communications Squadron provided a mobile control tower with generators and maintenance personnel for use in controlling the large number of military aircraft transporting relief supplies into the Eureka area.

11-12 August 1965

Watts Riot - The 146th Military Airlift Group provided ground transportation, drivers, dispatchers to help the State Command Post. In the 10 day period of the emergency, the 146th Military Airlift Group flew 247 hours, 80 missions, transported 5,677 passengers and 18,516 lbs of cargo.

The 162d Communications Group provided communications network between the Military Department Emergency Operations Center and areas of civil disturbance in connection with civil rights demonstrations and anti-Vietnam activities. Some of these were: anti-Vietnam demonstrations in Oakland, California, pointing to a march on the Oakland Army Terminal which is used as a departure terminal for military personnel going to South East Asia.

Fiscal Year 63 - 66

163d Communications Group C&E operations.

During the period of this report the 162d Communications Group continued to operate the California Air National Guard Communications Net (CALANG-COMNET). This system is a training and emergency communications net connecting the Military Department with all California Air National Guard Bases. It is used on a daily basis for State Military training business and during periods of emergency such as the Northern California Floods in December 1964 - January 1965, and Watts Riot in August 1965. Reliability of this system has averaged better than 95% in commission throughout the past four years.

Fiscal Year 66

In preparation for State emergency operations, the 162d Communications Group planned and conducted a practice deployment by air of a complete communications package from McClellan AFB to Oroville, California. As a result of this practice, the group is now able to have a complete emergency communications package ready for airlift to any part of the State within one hour in the event of disaster or other emergency.

USAF/DOD ASSISTANCE

August 1962

The 146th Air Transport Wing participated in Swift Strike II, at Camp Carson, Colorado, a combined Army-Guard operation designed to test limited war capabilities.

22 October 1962 - 16 November 1962

In support of Federal preparedness in connection with the Cuban contingency, all units of the California Air National Guard gave maximum attention to increased operational readiness. Direct support was rendered to DOD in the following actions:

a. Loaned following equipment to the USAF (it was returned to California in December 1962):

- 10 - 1/4 ton cargo trailers
- 40 - 1/2 ton cargo trailers
- 9 - 400 gallon water trailers
- 3 - Water-Alcohol trailers
- 1 - 011A Crash Fire truck
- 1 - 010A Crash Fire truck

b. Provided ground and air base support at Fresno Air National Guard Base for F106 aircraft deployed to Fresno for air alert and defense purposes.

December 1962

The 146th Air Transport Wing provided a C-97 to transport Mr. Bob Hope and his troop of entertainers on their annual Christmas tour of US Military bases overseas.

The 146th Air Transport Wing flew 20,000 lbs of medical supplies and Christmas gifts from Van Nuys to Los Angeles' sister city - Salvador, Brazil.

15 January 1963 - 7 March 1964

Beginning 15 January 1963 and continuing through 7 March 1964, the 163d Fighter Group trained 23 military personnel from Thailand, The Philippines and Korea under the Military Assistance Program, in the E-4 fire control systems and the armament and munitions systems of the F86D aircraft.

May 1964

The 146th Air Transport Group participated in Operation "Desert Strike" a joint exercise involving units of the Army and The Air Force, which was conducted in the California, Nevada and Arizona area from 17 - 30 May 1964. The 146th ATG provided the following support for the exercise:

- 18 missions
- 227 flying hours
- 526 passengers carried
- 92,000 pounds cargo carried
- 410 direct and indirect air technician mandays utilized
- \$1,374 base funds (federal) expenses
- 330 items of support equipment loaned for total of 560 workdays

November 1964

The 146th Air Transport Group, together with heavy transport aircraft of the Air National Guard conducted 27 overwater cargo missions to Saigon, Greenland, Turkey, North Africa and Iceland in direct support of the US Air Force Military Air Transport Service. These missions were in direct support of our build-up in Vietnam and were conducted in addition to the regular training missions. This additional support of the active forces continued to mount throughout the period of this report resulting in a grand total (approximate) of activity for the 146th ATG as follows:

- 585 missions flown
- 31,000 hours flown
- 36,000 passengers carried
- 11 million lbs cargo carried.

Included in above totals are 49 missions, 3,661 hours flown, 139 passengers carried, and 1,125,753 lbs of cargo transported into the Vietnam combat area by our Van Nuys, California units.

February 1965

The 129th Air Commando Group provided pilot instructors to check-out active Air Force pilots in the U10 aircraft and Air Commando Tactics. Training was done at the McConnell AFB, Topeka, Kansas.

4 - 17 February 1965

The 162d Communications Group participated in Joint Exercise "Polar Strike" and also used their newly issued "TRANSCOM" equipment in communications net linking the Alaskan Command at Elmendorf AFB, Alaska, into the AF communications net at McClellan AFB, California, to establish an emergency alternate route to CONUS Military Command Authorities. The TRANSCOM equipment (transportable communications central) provides a long range frequency radio teletype system which can cover a distance up to 2,500 miles with multi-channel voice and teletype circuits. It can be used to provide an emergency alternate communications system during State and Federal emergencies.

May 1965

The 146th Military Airlift Group transported a special "memory" disc for a Pentagon computer from Van Nuys to Andrews AFB. The computer component was so delicate that the slightest jar would require re-manufacture and considerable delay in returning the Pentagon's command computer to operational status. The flight was successfully completed, earning the 146th Military Airlift Group a "well done" by DOD officials.

June 1965

The 146th Air Transport Group participated in Alaskan Air Command Joint Exercise "Northern Hills" by flying units of Minnesota Army National Guard to Alaska.

13 July 1965

Headquarters, US Air Force requested the Air National Guard transport units to supplement the MATS Aeromedical Evacuation System, both domestic and overseas using ANG Airomedical Evacuation Crews. The 146th AME Squadron with its 115th and 195th AME Flight at Van Nuys ANGB, California, are to be used in this program. By December 1965, over 6,500 patients and 1,800 passengers were carried by ANG AME flights. Starting in September 1965, the 146th MAG with crews from the 115th and 195th AME Flights, began flying a bimonthly AME flight to Anchorage, Alaska. Totals for this operation from September 1965 through June 1966 are:

- 10 trips flown
- 250 hours flown
- 320 patients flown
- 230 passengers flown.

December 1965

During December 1965 the 146th Military Airlift Group participated in "Operation Christmas Star" carrying gifts and mail to our servicemen in Vietnam, flying six missions. In addition many tons of military cargo were carried aboard the aircraft with the Christmas gifts.

April - June 1966

The 129th Air Commando Group established a U6 aircraft and maintenance school at Hayward ANGB and provided training for Air Force personnel. This training was in direct support of the Vietnam War.

1 July 1962 - 30 June 1966

Continuing with a program initiated by the Military Department in 1959 over 2,400 Air National Guard basic airmen were airlifted from California, Nevada and Oregon to Lackland AFB, Texas, for basic military training. This program is designed to save over 1.2 million dollars each year in Federal funds. The 146th MAG at Van Nuys ANGB, California, provides a C97 aircraft for this regular airlift service.

Fiscal Year 62 - 66

During this period the 144th and 163d Fighter Groups continued with their participation in the Air Defense Commands Air Alert Program. This activity requires a specified number of our all-weather fighter interceptor aircraft and part time combat aircrews to be on 24 hour runway alert at the Fresno and Ontario bases. These aircraft and crews are under direct control of North America Air Defense Command and can be sent aloft to intercept and destroy, if required, any hostile aircraft approaching California. During the four year period of this report these aircraft were scrambled 3,479 times, intercepted 3,850 targets, and flew 5,786 hours under NORAD control.

The 216th GEEIA, a California ANG unit assigned to the Ground Electronic Environment Installation Agency of the Air Force, supported the active forces by installing and repairing communication-electronics equipment and systems. In addition this unit assisted California ANG units by installing communications systems at our California ANG base facilities.

SPECIAL OPERATIONS

June - September 1964

Guardlift I. Heavy air transports of the Air National Guard provided airlift for over 10,000 Army National Guard personnel to and from annual field training sites. The 146th Military Airlift Group participated actively, and in addition provided principal airlift support and terminal facilities for the movement of the 185th Infantry, California ARNG to Hickam AFB, Hawaii and elements of the 29th Infantry Division from Hawaii to Fresno. Total Air and Army Guardsmen transported to field training by all the Air National Guard during summer 1964 was over 17,000 with an additional 2,000 tons of cargo carried to support the training.

August 1964

Tactical Air Command and Military Air Transport Service units of the Air National Guard participated in an Air National Guard exercise called "Ready Go" during August 1964. The Air Guard MATS units, including California's 146th Air Transport Group located at Van Nuys participated in this largest movement in history of an all-reserve force to Europe. This operation was conducted without incident or accident, making it the most successful in the long history of the Air National Guard.

July - August 1965

The heavy transports of the Air National Guard, including the 146th Military Airlift Group, completed the largest air mobility exercise ever conducted by a reserve military force by transporting over 30,000 ARNG personnel to annual field training sites. This operation was dubbed "Guardlift II."

OTHER ITEMS

September - December 1963

During a 90 day period the 146th Military Airlift Wing operated their 16 C97 aircraft from Burbank, Palmdale and Los Angeles airports while the Van Nuys ANG Base runway was repaired.

Fiscal Year 65

A major breakthrough in personnel training was accomplished by completing arrangements with the Federal Aviation Agency (FAA) to provide on-the-job training of our 234th Mobile Communications Flight personnel in FAA civil control towers. Training is continuing and results to date indicate complete success in this critical training area.

Fiscal Year 66

The 162d Communications Group completed installation of the antennas for the long range SSB equipment of the TRANSCOM sets. The site location of these antennas is at Lincoln, California (Transmitter) and Davis, California (Receiver). These are locations conducive to antenna orientation on overseas locations to provide an emergency tie-in into the Defense Communications System (DCS) in the United States.

Data covering activities of the Air National Guard are indicated in the following statistical summaries:

CONSTRUCTION PROJECTS

July 62 - June 66

Compton ANGB, California

FY 65	Motor Pool Washrack and Government Furnished Hoist	\$ 8,200
FY 66	Concrete Storm Drain	1,850

Value: \$77,409,270.00

(Comment: During the period of this report all major units of the California Air National Guard converted to more modern aircraft. Air Defense Command units at Fresno and Ontario converted from the subsonic F-86L to the supersonic F-102A; the Military Airlift Squadrons at Van Nuys from the C-97A and C's to the more modern C-97G; the Air commando Group at Hayward from the SA-16's to C-119's and the U-6A.)

EQUIPMENT

Total Value: (Yearly Replacement Criteria 6.5%, Federal Funds.)

As of 30 June 1962

\$9,720,000.00

As of 30 June 1966

\$15,213,750.00

(Comment: Large increase in total value due to one large unit of the CAL ANG serving on extended active duty during the Berlin Emergency (the 146th Air Transport Wing) and not included in the 30 June 1962 total plus the conversion of the Air Defense Groups at Ontario and Fresno from the F-86L weapons system to the more expensive and highly sophisticated F-102 weapons system. We receive approximately 6.5% of our total equipment dollar value each year for orderly replacement of aged equipment items.)

Major items of equipment on hand as of 30 June 1966:

Vehicles:

Sedans and Station Wagons	23
Pick-ups	119
Trucks	112
Trucks, Tractor	33

	496
On Hand as of 30 June 1966	496
On Hand as of 30 June 1962	448
Gain	48

Replacement Criteria (AGE):

- Commercial Design: Every 7 years
- Military Design: Every 10 to 18 years

Emergency Equipment: During Calendar Year 1964 a CAL ANG program was established and completed to have available for immediate issued 1,200 complete sets of individual emergency equipment. Sets consist of rifle, bayonet, canteen, steel helmet, ammunition, first aid pack, mess kit and supporting field equipment. Emergency equipment sets of 300 each are at the flying bases of Van Nuys, Ontario, Fresno and Hayward. This equipment is in addition to small arms and emergency equipment in possession of Air Police units.

Communications Equipment:

<u>NOUN</u>	<u>QTY</u>	<u>COST</u>
AN/TCS-28 Communications System	1 ea	\$984,000.00

A transportable HF SSB radio system capable of providing 3 voice and 16 tele-type channels with a range of 300-2,500 miles. Consists of five vans, six generators (2 ea 60KW, 30 KW, and 15 KW), spare parts, and test equipment.

AN/GRC-129 Radio Set	18	\$280,800.00
----------------------	----	--------------

A mobile HF SSB radio system designed to provide one voice and one teletype channel with a range of 50 to 1,500 miles.

AN/GRC-26D Radio Set	9	\$140,400.00
----------------------	---	--------------

A mobile HF AM radio capable of either one voice or one teletype channel with a range of from 50 to 1,000 miles.

<u>NOUN</u>	<u>QTY</u>	<u>COST</u>
AN/KWM-2A Transceiver	14	\$ 25,000.00
A mobile HS SSB transceiver providing one voice channel with a range up to 1,500 miles.		
AN/TTC-7 Telephone Switchboard	1	\$ 25,300.00
A mobile 200 line manual 3 position radio or wire circuits.		
SB-86 Telephone Switchboard	16	\$ 63,552.00
A portable 60 line manual switchboard.		
AN/MGC-2A Communications Center	3	\$ 46,077.00
A trailer van providing two duplex teletype positions. Can be used to terminate wire or radio circuits.		
AN/MGC-6A Teletypewriter Set	3	\$ 38,079.00
A van mounted crypto center providing one on line and two off line cryptographic positions. Supports MGC-2A.		
16F3 Transceiver	2	\$ 1,836.00
A mobile transceiver capable of one voice circuit. Normal range 15 to 30 miles dependent upon terrain. Used for Air Police and Maintenance Control.		
AN/TRC-24 Radio System	20 relays 10 terminals	\$525,200.00
A transportable radio system capable of providing 12 two way voice channels or 11 voice channels and 16 teletype channels. Normal distance between relays is 35 miles, however, it is possible to transmit over greater distances by selecting the proper relay sites. This equipment is all van mounted.		
Tape Relay Van (Major)	1	\$ 80,000.00
A mobile van equipped as a torn tape teletype relay center capable of handling 12 duplex channels.		

<u>NOUN</u>	<u>QTY</u>	<u>COST</u>
Tape Relay Van (Minor)	2	\$ 60,000.00

A mobile van equipped as a torn tape teletype relay center capable of handling 4 duplex channels.

AN/TPN-12 and Associated A/G Radio Equipment	1	\$ 62,912.00
---	---	--------------

A transportable ground controller approach radar set. Surveillance system 40 mile range - capable of precision control of one aircraft at a time.

AN/MSQ-10A Weather Intercept	1	\$ 16,200.00
------------------------------	---	--------------

A mobile van with the capability of receiving either or both teletype and facsimile weather broadcasts.

AN/MRC-41 Radio Set	4	\$ 42,300.00
---------------------	---	--------------

A radio relay/terminal mounted in a two wheel van. Provides 4 voice channels or eight duplex teletype channels. Line of sight transmission characteristics.

AN/MRN-13 Homing Beacon	1	\$ 22,400.00
-------------------------	---	--------------

A low frequency mobile homing beacon.

AN/MRN-12 Mobile Control Tower	1	\$115,000.00
--------------------------------	---	--------------

A van mounted control tower providing VHF, UHF, and HF radio channels. Capable of all functions of a normal airport control tower.

MB-18 Generator Set 30KW Generator 3 phase 120/208V	6	\$ 26,268.00
--	---	--------------

MB-17 Generator Set	2	\$ 11,892.00
---------------------	---	--------------

A 60KW generator set 120/208V 3 phase.

PE-95 Generator Set	36	\$125,200.00
---------------------	----	--------------

A 10KW single phase generator 125V or 250V single phasing.

<u>NOUN</u>	<u>QTY</u>	<u>COST</u>
EMU 10 Generator	6	\$ 19,980.00
A 10KW generator capable of 120/240V single or three phase can be operated 2, 3, or 4 wire.		
MB-5 Generator	26	\$131,638.00
A 10KW diesel generator mounted on a two wheel trailer chassis. Rated at 120/240V 60 cycles single phase.		
PU-286/G Generator	40	\$ 55,440.00
A 5KW generator rated at 120V single phase.		
B-12 Generator	18	\$ 9,414.00
A 2.5KW generator rated at 120V single phase.		

Supplies and Spare Parts: The state wide inventory of spare parts on hand for issue to units of the California Air National Guard as of June 1962 amounted to \$4,500,000.00. At the end of this report period it had increased to a total dollar value of \$6,622,941.00. Generally a Base supply will do a net business of slightly in excess of its dollar value each year, returns to Air Force Depots are not included in net business. Funds in the amount of \$816,000.00 were provided directly to the State during fiscal year 1966 for the local procurement of supplies and materiel, the remainder being obtained from Air Force Depots.

Inventories and Audits: To provide continuing protection for the State against payment for property lost by agents of the State, the Systems and Logistics Branch conducted annual inventories and audits at each of the four flying bases, the three non-flying bases and the four separate Squadrons. Although as of 30 June 1966 the units concerned were in possession of over 15 million dollars in equipment and over 6 million dollars in supplies, there was no loss of property charges assessed to the State during this four year period.

Dates and locations of training of California Air National Guard units are listed in Appendix N.

Organizational changes within the California Air National Guard during the period of this report are listed in Appendix O.

Year end strengths of California Air National Guard units during the period of this report are listed in Appendix P.

UNITED STATES PROPERTY AND FISCAL OFFICER

Two events of this reporting period had a major impact on the program of the USPFO. They were: receipt of Automatic Data Processing Equipment (ADPE) in July 1964, and the equipping of Selected Reserve Force units, beginning late 1965 and continuing through 1966.

The USPFO for California was the first USPFO in the United States to receive this equipment and formulated many basic procedures and practices for the guidance of other states when they received their ADPE. The use of this equipment has greatly improved the efficiency and scope of the USPFO logistical service and support of the CAL ARNG.

In recognition of the high priority of Selected Reserve Force (SRF) units, transfer of a vast quantity of property to that force from other CAL ARNG units had to be initiated. Estimated completion date is 31 December 1966. Further, issue to this force of virtually 100 per cent of all authorized allowances of property, much of which had to be obtained through DOD and DA supply depots, became necessary and was about 75 per cent completed by 30 June 1966.

Federal funds expended within the State of California in support of the California National Guard are as indicated in Appendix E.

STATE MAINTENANCE OFFICER

During the period of this report, several events were of particular significance to the State Maintenance System and its operations.

October 1962

CAL ARNG implementation of Phase II (Training of Unit Instructors), NGB Operation TAERS Training Plan, through SMO presentation of two-four day Army Area Schools dealing with the Army Equipment Record System (TAERS) to 70 ARNG instructor personnel at Fort MacArthur and Sharpe Army Depot.

May 1964

Desert Strike.

August 1965

Los Angeles Civil Disturbance.

Both Desert Strike and the Los Angeles Civil Disturbance required direct, general support and back-up organization maintenance assistance, including major equipment recovery efforts.

November 1965

Conduct of state-wide SMO Materiel Readiness course encompassing the Army Equipment Record System (TAERS); Command Maintenance Management Inspections (CMMI); Equipment Serviceability Criteria (ESC) presented in a series of six classes by three instructional teams to 742 ARNG personnel.

May 1966

Initial study and approval by Department of the Army for ARNG conduct of the Army Aviation School Rotary Wing Qualification Training Course with California selected as the instructional pilot state. Sole responsibility for course implementation vested in the State Aviation Officer. An ARNG "First".

TECHNICIANS

Army National Guard technicians are, with a limited number excepted, federally recognized members of units and are employed by the States. They assist the unit commanders in the day-to-day administrative and training responsibilities and assist the United States Property and Fiscal Officer with his duties. They provide the first and second echelon maintenance in organization maintenance shops and higher echelon maintenance in the States. They provide personnel necessary to keep the NIKE missile sites operational 24 hours a day for air defense of the United States. Also, they provide necessary staffing for Military Support of Civil Defense to coordinate the possible military resources available for supporting the civil defense missions.

Worthy of note during this reporting period is the 288 increase in technician authorization from 1,375 on 1 July 1962 to 1,663 on 30 June 1966; a 21% increase in overall authorization. The major increases in manning were in both the number of air defense technicians and state maintenance; whereas, the number of USPFO technicians decreased by three during the same period.

The overall funding support increased from \$8,252,845 in FY 63, to \$10,974,035 in FY 66, for a 33% increase.

The 12% difference of the greater increase of funds over technician authorization is due to the salary increases during the four year period.

ARNG TECHNICIAN AUTHORIZATION

FY 63

<u>Project</u>	<u>Start of FY</u>	<u>End of FY</u>	<u>Description</u>
7512	579	572	Organizational techs including OMS and State Hqs
7513	135	135	USPFO
7514	255	256	State Maintenance
7621	406	478	Air Defense
TOTAL	<u>1,375</u>	<u>1,441</u>	

Comments: The major change in the technician program during FY 63 was in Project 7621 by increasing the authorized number of air defense technicians by 72 on 11 December 1962.

FY 64

7512	572	586	Organizational techs including OMS and State Hqs
7513	135	132	USPFO
7514	256	297	State Maintenance
7621	478	562	Air Defense
TOTAL	<u>1,441</u>	<u>1,577</u>	

Comments: Major change in the air defense, Project 7621, was effective 8 October 63 by increasing authorized manning by 84 positions. State Maintenance manning authorization was increased by 41 positions by including all authorized criteria positions. This did not increase the funding support during the fiscal year.

FY 65

7512	403	428	Organizational techs including OMS and State Hqs
7512 (OMS)	159	170	OMS
7513	132	132	USPFO
7514	296	293	State Maintenance
7621	562	568	Air Defense
TOTAL	<u>1,552</u>	<u>1,591</u>	

Comments: Major Program changes were increased AST authorization and authorization of the flight activities in Project 7512. OMS authorization increased by 11 positions; however, funding continued at only 135 positions.

ARNG Technician Authorization (Cont'd)

<u>FY 66</u>			
<u>Project</u>	<u>Start of FY</u>	<u>End of FY</u>	<u>Description</u>
3711	419	456	Training Operations
3721	568	581	Air Defense
3731	609	609	Logistics Support
3742	9	9	State Hqs
3743	8	8	Civil Defense
TOTAL	1,613	1,663	

Comments: At the start of FY 66 the project numbers and descriptions were changed from preceding years. New Project 3711 contains only the field organization and unit technicians. Project 3731 entitled Logistics Support contains OMS, USPFO and all support maintenance shops, field training equipment concentration sites, army aviation maintenance shops and the transportation aircraft shop. A total of 50 extra positions was authorized the Fresno Transportation Maintenance Shop by an Interservice Support Agreement from Sharpe General Depot.

Temporary positions are not included.

STATE MILITARY RESERVE

In April 1962, the California National Guard Reserve (CNGR), the forerunner to the present State Military Reserve (SMR), had undergone substantial reorganization. Two Area Commands had been established. The Southern Area Command, headquartered in Los Angeles, had responsibility for all southern California and a portion of the Central Valley, up to and including Fresno County. The Northern Area Command, headquartered in San Francisco, had responsibility for the remainder of the Central Valley and all of northern California. Reorganization also included the inactivation of all CNGR units in the Southern Area Command's zone of responsibility. Personnel assigned to those units were either transferred to the SMR List, the SMR Retired List, or were discharged, with the exception of two officers who were selected for assignment to Headquarters and Headquarters Company, Southern Area Command (HHC, SAC).

On 1 July 1962, the only active unit in the Southern Area Command was HHC, SAC. The Northern Area Command (NAC) was composed of HHC, NAC; Operational Commands (Op Comd) II, III, and IV; 13 infantry battalion headquarters; and 9 rifle companies. NAC had an aggregate strength of 468 officers and enlisted personnel. The Southern Area Command was attached to the 40th Armored Division, CAL ARNG; the Northern Area Command remained under the direct command of The Adjutant General. Brigadier General Emmett A. Rink commanded SAC, and Brigadier General Osborne White commanded NAC.

On 20 September 1963, as the result of legislative amendment of the Military and Veterans Code, the California National Guard Reserve was redesignated the State Military Reserve.

Between 1 July 1962 and 30 June 1965, the State Military Reserve conducted intensive recruiting campaigns, which resulted in the activation of additional units, particularly in the Southern Area Command. As of 30 June 1965, the organization and strength of the SMR was as shown in the following chart:

<u>ACTIVE UNITS BY TYPE</u>				
<u>Command</u>	<u>Operational Commands</u>	<u>Battalion Headquarters</u>	<u>Rifle Companies</u>	<u>Aggregate Strength</u>
SAC	3	14	8	510
NAC	3	12	14	449
Totals	6	26	22	959

In addition to weekly evening training assemblies at home stations, the SMR conducted weekend exercises and weapons firing annually. Officer schools were held periodically. Schools were also established to qualify selected enlisted personnel for appointment as commissioned officers.

The training conducted was designed to prepare personnel and units for service in support of civil authority during State and local emergencies. SMR Operational Commands trained to assist the State civil defense organization in producing intelligence concerning the results of enemy attack on the State. Infantry battalions and rifle companies trained primarily to assist civil law enforcement officials during emergencies. On two occasions, SMR personnel and units performed vital tasks in support of civil authority in 1964 and 1965.

SMR personnel, in a voluntary status, assisted civil officials in Crescent City, on 20-21 March 1964, when that community was struck by the devastating tidal wave that followed the Alaskan earthquake. In December 1964, SMR personnel of the 18th Battalion were ordered into State service due to severe flooding in Humboldt County. Thirteen officers, one warrant officer, and 19 enlisted men were on duty from 22 December 1964 until 20 January 1965. They assisted in developing intelligence concerning the flood situation for local authorities, provided message center service to the County operations center, performed security and traffic control duties, assisted in search and rescue missions, and conducted patrols.

The Military Department budget for FY 65-66 did not provide any funds for supporting the SMR. Accordingly, The Adjutant General inactivated the SMR effective 1 August 1965, and transferred all members of the Active SMR to the SMR Reserve List.

Subsequently, The Adjutant General Activated 5 Operational Information Sections (OIS) to fulfill his departmental responsibilities to provide personnel to assist in the production of intelligence at headquarters of the State Mutual Aid Regions in the event of a war-caused emergency. Each OI Section is authorized 14 officers and 4 enlisted personnel. The organization and strength of the Active SMR, as of 30 June 1966, was as follows:

<u>Unit</u>	<u>Officer Strength</u>	<u>WO Strength</u>	<u>Enlisted Strength</u>	<u>Aggregate</u>
OIS I	10	1	4	15
OIS II	12	0	3	15
OIS III	12	0	4	16
OIS V	9	1	4	14
OIS VI	<u>11</u>	<u>0</u>	<u>3</u>	<u>14</u>
Totals	54	2	18	74

(Note: OIS IV was not activated)

As of 30 June 1966, further expansion of the State Military Reserve was not contemplated.

APPENDIX I

OPINIONS OF THE ATTORNEY GENERAL

In response to questions by The Adjutant General, The Attorney General of the State of California rendered the following opinions that are of interest to the Military Department:

Question: "May an individual presently under the State Military System pursuant to sections 228 and 256, Military and Veterans Code, elect and have paid an annuity for surviving members of his family in the same manner as provided for members of the Federal Armed Forces under Title 10, U.S.C. sections 1431-1444 (formerly the Uniformed Services Contingency Option Act of 1953)?"

OPINION NO. 63-95, dated October 14, 1963

The conclusion is: "The provisions of Title 10, U.S.C. sections 1431-1444 (formerly the Uniformed Services Contingency Option Act of 1953) are incorporated in the State Military Retirement System by sections 228 and 256, Military and Veterans Code and the benefits therein should be afforded members of the State Military Retirement System in accordance therewith."

Question: "May active duty for training performed prior to August 10, 1956, be included in the computation of active service in the determination of eligibility for retirement of military members of the Office of The Adjutant General under sections 228 and 256, Military and Veterans Code?"

OPINION NO. 65-34, dated March 23, 1965

The conclusion is: "Active duty for training performed prior to August 10, 1956, may not be included in the computation of active service for retirement by military members of the Office of The Adjutant General."
